Axiom Trading

Company Knowledge Base, Trading Rules & Operational Reference Document

Company: Axiom Trading Group Inc. | **Established:** 2022 | **Support Email:** support@axiomtrading.io | **Portal:** portal.axiomtrading.io

Welcome to Axiom Trading, where we're reshaping the prop trading landscape. Consider us as your guide to a simulated funded trader program tailor-made for all traders, regardless of experience.

We've created a comfortable environment for you to refine your skills, making informed simulated trades under real market conditions—minus the risk to your own capital. Our distinctive array of challenges makes us one of the top prop firms, dedicated to helping you unlock a new level of trading expertise.

1. GENERAL COMPANY & ACCOUNT OVERVIEW

What is a Simulated Funded Account?

A Simulated Funded Account is traded in a demo environment. Evaluation plans provide this account after you pass the required stages and meet the account requirements. Instant Funding and Instant Mini Funding provide direct access without an evaluation.

Is Axiom Trading an established prop firm?

Yes! We have been operating since 2022 and are focused on fast payouts and better support. We've even won awards for it! We've rewarded traders around the world, are one of the highest-rated firms on Feefo and Trustpilot, and are proud to have established ourselves with a strong presence in the prop firm industry.

Which Platforms can I use for simulated trading at Axiom Trading?

Axiom Trading offers MetaTrader 5 (MT5) and Match-Trader.

Can I switch between simulated trading platforms?

Yes. You may request to switch platforms as long as your account has not been traded. Platform changes are no longer available once the account reaches Phase 2, Phase 3, or the Funded Stage.

Who Is Your DataFeed Broker?

Our data feed broker is Match-Prime.

2. NEWS TRADING POLICIES & RED FOLDER RESTRICTIONS

Is News Trading Allowed?

News trading rules depend on the specific account plan:

Plan Type	Rule	Breach / Action
Standard 1 Step	Do not open or close trades on affected instruments from 2 minutes before until 2 minutes after an applicable Red Folder release.	Hard Breach
Standard 2 Step	Do not open or close trades on affected instruments from 2 minutes before until 2 minutes after an applicable Red Folder release.	Hard Breach
Standard 3 Step	Do not open or close trades on affected instruments from 2 minutes before until 2 minutes after an applicable Red Folder release.	Hard Breach
2 Step OMO	Yes, but profit from any single news event is capped at 0.50% of your account balance. Any profit above the cap will not count toward your balance. (Applicable in Funded Stage only)	Profit Capped
Buy Now Pay Later	Yes, without restriction.	Allowed
Instant Funding	Yes, without restriction.	Allowed
Instant Mini	Yes, without restriction.	Allowed

> **Standard-Plan News Restrictions Details:** Standard-plan news restrictions follow the ForexFactory Red Folder calendar and Axiom Trading's affected-instrument list. Some macroeconomic events restrict all instruments. The window also covers take-profit execution and automatic closure on reaching the challenge profit target. During the Challenge, opening or closing a trade in the restricted window is a hard breach. In the Simulated Funded Account, profits generated in the restricted window are excluded.

Which instruments are affected by Red Folder news?

For Standard 1 Step, Standard 2 Step, and Standard 3 Step, the restriction runs from 2 minutes before until 2 minutes after the relevant release:

Affected Instruments	Relevant News Releases (ForexFactory Red Folder)
All instruments	CPI, FOMC statements/meetings, and Non-Farm Employment Change (NFP).
Gold, silver and indices	USD, AUD and CAD high-impact releases; interest-rate decisions, press conferences, CPI and GDP across currencies; USD Core PCE.
USD forex pairs and US indices	Employment/NFP, unemployment, PMI/ISM, inflation, GDP, Federal Reserve decisions/statements, trade, jobless claims, confidence, JOLTs, earnings, bond auctions, housing, durable goods, speeches and retail sales.
EUR forex pairs and EU indices	PMI, inflation, GDP, employment, retail sales, trade, ECB decisions/statements, confidence and speeches.
GBP forex pairs	Inflation, GDP, PMI, employment, housing, retail sales, trade, production, BoE decisions and speeches.
CAD forex pairs and oil	BoC decisions, PMI, inflation, GDP, trade, employment, housing, sales and speeches.
AUD/NZD/CHF forex pairs	Relevant central-bank decisions, inflation, GDP and speeches; AUD/NZD employment releases.
JPY forex pairs and Asian indices	BoJ decisions, inflation, GDP, employment, PMI, production, trade, retail sales and speeches.
US/UK oil	Crude Oil Inventories; CAD high-impact news.

3. DRAWDOWN CALCULATIONS & METHODOLOGIES

What is Equity-Based Drawdown?

Equity-based drawdown calculates your daily loss limit using the higher of your balance or equity at 00:00 UTC. This means unrealized profits are included when determining your daily drawdown limit.

> **Example:** On a $10,000 account, if your equity at 00:00 UTC is $10,300 and your balance is $10,000, the higher amount is $10,300. With a 4% daily drawdown, your limit is $412, meaning your equity must not fall below $9,888 that day.

What is Trailing Drawdown?

Trailing drawdown is a moving loss limit that follows your highest account equity. As your equity increases, the drawdown limit moves up with it. The floor does not move down when equity decreases.

> **Example:** On a $10,000 account with a 5% trailing drawdown, the initial limit is $9,500. If your equity reaches $11,000, the limit moves to $10,450. If your equity falls below $10,450, the account breaches the drawdown limit.

What is Static Drawdown?

Static drawdown is a fixed loss limit based on your initial account balance. The drawdown limit does not move up as your balance or equity increases.

> **Example:** On a $10,000 account with an 8% static drawdown, your drawdown limit is $9,200. This limit remains fixed, even if your account grows.

4. ACCOUNT RULES, HOLDING & MERGING POLICIES

Can I merge accounts?

Yes. You can merge Simulated Funded Accounts as long as they are from the same plan:

- Standard 1 Step Simulated Funded Account + Standard 1 Step Simulated Funded Account: Allowed
- Standard 2 Step Simulated Funded Account + Standard 2 Step Simulated Funded Account: Allowed
- Standard 1 Step Simulated Funded Account + 2 Step OMO Simulated Funded Account: Not allowed
- You can merge accounts up to a maximum combined balance of $200,000.

Can I trade and hold positions overnight or over the weekend?

Yes. You may trade and hold positions overnight or over the weekend. Axiom Trading also offers 24/7 gold trading.

Can I Use a Different Device for Trading?

Yes. You may trade from a different device as long as you are the person trading on the account and the device belongs to you.

Is VPN Allowed?

Yes. VPN usage is allowed.

Is copy trading allowed?

Yes. Copy trading is allowed only when copying your own trades between your accounts. Using an EA for copy trading is prohibited. Trades must be copied manually.

5. TRADABLE INSTRUMENTS

What Instruments Can I Trade?

Axiom Trading offers a wide range of instruments, including Forex, Commodities, Indices, and Cryptocurrencies:

Commodities

ALUMINIUM | BRENT | COCOA | COFFEE | COPPER | CORN | COTTON | NGAS | SOYBEAN | SUGAR | WHEAT | WTI | XAGUSD | XAUUSD | XPDUSD | ZINC | XPTUSD

Cryptocurrencies

BTCEUR | BTCUSD | ETHBTC | ETHUSD

6. LEVERAGE, COMMISSIONS, FEES & TEST ACCOUNTS

What is the refund policy of Axiom Trading?

Your initial challenge fee is refunded after your third reward from your Simulated Funded Account. The refund is processed and sent separately from your rewards.
The refund policy applies to: 1 Step Simulated Funded Account, 2 Step Simulated Funded Account, 2 Step OMO Simulated Funded Account, 3 Step Simulated Funded Account, Buy Now, Pay Later Simulated Funded Account, and Instant Funding.

What Leverage Does Axiom Trading Offer?

Forex: 1:75
Commodities and Precious Metals: 1:20
Gold: 1:100 (2 Step OMO Only)
Indices: 1:20
Digital ETFs: 1:2

What Are the Trading Commissions?

Standard: $2 USD per lot traded per side ($4 USD per lot round trip)
Precious Metals: $3 USD per lot traded per side ($6 USD per lot round trip)
Energy: $3 USD per lot traded per side ($6 USD per lot round trip)

Does Axiom Trading Offer Swap-Free Accounts?

Yes. All Axiom Trading account plans are swap-free.

What Are the Spreads?

Spreads vary depending on market conditions. Traders can view spreads on our test accounts:

- **Match-Trader – Standard Test Account:** Platform Link: https://manager.axiomtrading.io/ | Email: demo@axiomtrading.io | Password: Testspread123
- **MetaTrader 5 (MT5) – Test Account:** Login: 10333423 | Password: xuhheE5! | Server: AxiomTradeServer
- **Prediction Markets – Match-Trader Test Account:** Platform Link: https://manager.axiomtrading.io/ | Email: demo@axiomtrading.io | Password: Testspread123 | Account ID: 820278

Important: Spreads are variable and may differ between instruments, account types, and market conditions. The spreads displayed on the test accounts reflect conditions at the time of checking and may change without notice.

7. PAYOUTS, KYC & COMPLIANCE POLICIES

What withdrawal methods are available?

Available payout methods depend on your country:

- **For Nigeria, Kenya, and Ghana:** Direct Bank Transfer; Digital Currencies (USDT-BSC or USDC-ERC20).
- **For other countries:** Digital Currencies (USDT-BSC or USDC-ERC20); Rise Pay.

What information do I need for KYC?

To complete your KYC verification, please ensure that all personal information you provide is accurate and matches your valid government-issued identity document.

- **Accurate Personal Details:** Your information must match the details on your government-issued ID. Inaccurate information or missing documents may result in KYC failure.
- **Consistent Email Address:** Use the same email address throughout your Axiom Trading journey, including when purchasing multiple accounts. Breaching an account does not mean you need a new email address. Continue using your existing email address if you purchase another challenge. Using different email addresses may affect your KYC verification.
- **Government-Issued ID:** Submit a valid identity document, such as a passport, driver's license, residence permit, or national ID card. (Accepted documents verified via Veriff: https://www.veriff.com/supported-countries).
- **Payment Card:** Use a payment card registered in your own name. Third-party payment cards may prevent you from completing KYC or receiving a Simulated Funded Account.
- **Nigerian Traders:** Nigerian traders may be required to provide a NIN number and a Selfie taken on the same day.
- **Personal Verification:** You must use your own identity and personal information. Using another person's ID, email address, or payment card may result in automatic KYC rejection. Having another person in the camera frame during the KYC verification process will result in account termination.
- **Age Requirement:** Traders must be 18 years of age or older. Underage traders are not eligible to complete KYC.
- **Information Changes:** Personal information cannot be changed once you have placed a trade in your Challenge account or during the KYC process.

What Is the IP Address Policy?

Your IP address should remain within the same geographical region throughout your Axiom Trading journey to verify that you are trading independently. If your IP address changes significantly, Axiom Trading may request proof or an explanation for the change. This may include travel documents, live location verification, or other supporting evidence deemed appropriate by Axiom Trading.

Will Changing My Location Affect My Payout?

Changing your location may require verification. If you travel overseas, you may be asked to provide supporting documents, such as a plane ticket or travel itinerary, to verify the location change.

8. TRADING STYLE RULES & PROHIBITIONS

What Are Axiom Trading's Trading Style Rules?

Axiom Trading prohibits the following trading styles: Excessive Scalping, All-In Trading, and Gamifying the Challenge. Traders must follow responsible trading practices and comply with all applicable account rules.

What is excessive scalping?

Excessive scalping means holding more than 50% of your trades for less than 60 seconds (1 minute).

> **Example of Excessive Scalping:**
> A trader makes 50 trades in total.
> 26 trades are held for less than 60 seconds.
> 24 trades are held for 60 seconds or longer.
> 26 out of 50 trades is 52%, which exceeds the permitted 50%.
> This is considered excessive scalping and is not allowed.

What is All-in Trading rule?

All-in trading refers to risking an amount that could breach your daily drawdown or maximum drawdown in a single trade or setup. All-in trading is not permitted on any Axiom Trading Challenge or Simulated Funded Account.

This includes:

- **No stop-loss:** Opening a trade without a stop-loss and holding it until you pass or fail the challenge.
- **Risking too much:** Setting a stop-loss that risks more than your account's allowed drawdown limit.
- **Layering positions:** Opening multiple trades on the same instrument and in the same direction without proper risk management, or when the combined risk exceeds your allowed drawdown limit.
- **Multiple trades with open risk:** Opening multiple trades across multiple assets where the combined risk of these trades is greater than the drawdown limits.

> **Examples of All-in Trading:**
> **Example 1 (No stop-loss):** A trader opens a 1-lot EUR/USD trade without a stop-loss. The trader holds the position until the account either passes or fails the challenge. This is considered all-in trading because the trader is relying on one trade to determine the outcome of the account.
>
> **Example 2 (Risking more than drawdown limit):** A trader has a $10,000 Two-Step Challenge with a 4% daily drawdown limit ($400). The trader opens a EUR/USD trade with a stop-loss that risks 6% of the account ($600). If the stop-loss is hit, the account will exceed its drawdown limit and fail the challenge. This is considered all-in trading.
>
> **Example 3 (Layering positions):** A trader opens multiple EUR/USD trades in the same direction. The trader does not use a stop-loss, or the combined risk of the trades exceeds the account's drawdown limit. This is considered all-in trading.
>
> **Example 4 (Multiple trades with open risk):** A trader opens multiple trades across multiple assets, using stop-loss for these trades. However, the combined risk of these trades is greater than the drawdown limits.

What Is Gamifying the Challenge?

Gamifying the challenge means using opposing positions across accounts to create a near-guaranteed chance of passing, such as going long on one account and short on another.

> **Example:** You open a buy trade on Account A and an equal sell trade on Account B at the same time. If the market moves up, Account A profits while Account B loses; if the market moves down, Account B profits while Account A loses. This is considered gamifying the challenge rather than genuine trading.

This also includes reversing positions between Axiom Trading and another prop firm to offset risk. Trading large portions of your account on single bets with a 1:1.25 or lower risk-to-reward ratio may also be considered gamifying the challenge. This approach is not permitted.
